

SAFE ENVIRONMENT ENGINEERING TO EXHIBIT AT AMERICAN INDUSTRIAL HYGIENE CONFERENCE & EXHIBITION

May 7, 1998, Valencia, California - Safe Environment Engineering announced that the Company will exhibit its Life-line™ Confined Space and Security Monitoring System at the 1998 American Industrial Hygiene & Exhibition, taking place in Atlanta, Georgia, May 11 - 14, 1998. The conference provides an opportunity for vendors to the Safety industry to exhibit and discuss the latest innovations in worker safety. The highlight of Safe Environment's exhibit, will be the introduction of the new Portable Safety Monitor (PSM), which will be displayed for the first time at this exhibition. The new PSM has been eagerly anticipated by both current users of Life-line™ and others considering new installations.

Further information about the [1998 American Industrial Hygiene Conference & Exhibition](#) can be obtained through the AIHA's web site.

Safe Environment Engineering, located in Valencia, California, develops and supplies communications systems which integrate wireless telemetry in order to transmit information. The Company uses this technology in its patented Life•line™ systems, which, in one version, enables monitoring of entrants into confined spaces or hazardous locations; and, in other configuration, monitors security personnel on patrol rounds.
