

The Boeing Company Places Order For Installation of Life·line™ System

Valencia, California; March 30, 1998 - Safe Environment Engineering announced that The Boeing Company has placed an order to purchase and install the Life·line™ (Lifeline) Confined Space Monitoring System in it's aircraft manufacturing facility in Everett, Washington.

Safe Environment Engineering, located in Valencia, California, develops and supplies communications systems which integrate wireless telemetry in order to transmit information. The Company uses this technology in it's patented Lifeline systems.

- Lifeline enables monitoring of entrants into confined spaces or hazardous locations
