David Lamensdorf Joins Advisory Committee for the Center for Unconventional Security Affairs (CUSA).

David Lamensdorf, president of Safe Environment Engineering, has joined the advisory committee of the Center for Unconventional Security Affairs (CUSA).

CUSA, based at the University of California at Irvine, seeks to address the crucial elements of national security in the 21st century by utilizing the expertise, experience and ongoing collaboration of business, government and the non-profit sector through unique partnerships, education, and research. Viewed by experts as the necessary approach to new threats challenging the US and its economy, CUSA is uniquely suited to respond to the need for a collaborative approach to identifying and addressing new threats and our vulnerabilities to them. CUSA will play a role at the national level on security decisions based on the unique perspective it can provide through the interaction of business and national security decision-makers.

CUSA is currently receiving regional and national attention for its efforts.
